Terror, Culture, Politics: Rethinking 9/11 takes a critical look at the politics of American culture in the wake of the 2001 terrorist attacks. The volume takes as axiomatic -- and, therefore, as demanding careful scrutiny -- the connection between culture as creative expression and culture in the broader sense of the beliefs, values, and habits that members of a society hold in common. Coming from a wide array of disciplines -- art history, history, literature, media studies, law, and political science -- the contributors ask not so much how 9/11 changed American culture but how our existing cultural patterns, in such separate but linked domains as the media, public art, and political thought, shaped our responses to it. This is a study in the pathology of cultural criticism. By analyzing the thought and influence of three leading critics of modern Germany, this study will demonstrate the dangers and dilemmas of a particular type of cultural despair. Lagarde, Langbehn, and Moeller van den Bruck--their active lives spanning the years from the middle of the past century to the threshold of Hitler's Third Reich--attacked, often incisively and justly, the deficiencies of German culture and the German spirit. But they were more than the critics of Germany's cultural crisis; they were its symptoms and victims as well. Unable to endure the ills which they diagnosed and which they had experienced in their own lives, they sought to become prophets who would point the way to a national rebirth. Hence, they propounded all manner of reforms, ruthless and idealistic, nationalistic and utopian. It was this leap from despair to utopia across all existing reality that gave their thought its fantastic quality. Edward Said has long been considered one of the world's most compelling public intellectuals, taking on a remarkable array of topics with his many publications. But no single book has encompassed the vast scope of his stimulating erudition quite like *Power, Politics, and Culture*, a collection of interviews from the last three decades. In these twenty-eight interviews, Said addresses everything from Palestine to Pavarotti, from his nomadic upbringing under colonial rule to his politically active and often controversial adulthood, and reflects on Austen, Beckett, Conrad, Naipaul, Mahfouz, and Rushdie, as well as on fellow critics Bloom, Derrida, and Foucault. The passion Said feels for literature, music, history, and politics is powerfully conveyed in this indispensable complement to his prolific life's work. This title was first published in 2002: Examining problems that have caused much debate within political science, this book seeks to identify a proper place for the analysis of culture and values within political science. It goes on to explore the impact of globalization upon society. "What does culture have to do with policy? Debates over offensive art and government funding represent only a small part of our cultural landscape. We need to think about culture differently and bring new contexts to changing realities. What challenges will American cultural life face in the future? How will new communications technologies and global transformations affect the way we perceive culture? Can cultural institutions survive a loss of support and reach new audiences? How might the arts and culture activate neighborhoods and cities?" "The Politics of Culture brings together important recent thinking in this emerging field. Featuring fresh research and thought-provoking commentary, these selections provide a compelling outline for the future of American cultural policy."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved Essays exploring the relationship between culture and politics in the modern world. In *The Cultural Politics of the Emotions*, Sara Ahmed develops a new methodology for reading "the emotionality of texts." She offers analyses of the role of emotions in debates on international terrorism, asylum and migration, and reconciliation and reparation, and reflects on the role of emotions in feminist and queer politics. Of interest to readers in gender studies and cultural studies, the psychology and sociology of emotions, and phenomenology and psychoanalysis, *The Cultural Politics of the Emotions* offers new ways of thinking about our inner and our outer lives.--Publisher description Political culture is one of the central, but most difficult, concepts in political science. This reader explores this concept by compiling previously published works that focus on the core themes of political culture research: concepts and applications, culture and globalization, popular culture, civil society and social capital, social movements and collective identity, culture and political change and culture and rationality. Each section includes general and article introductions as well as a suggested reading list. *The Routledge Handbook of French Politics and Culture* provides a detailed survey of the highly differentiated field of research on French politics, society and culture across the social sciences and humanities. The handbook includes contributions from the most eminent authors in their respective fields who bring their authority to bear on the task of outlining the current state-of-the-art research in French Studies across disciplinary boundaries. As such, it represents an innovative as well as an authoritative survey of the field, representing an opportunity for a critical examination of the contrasts and the continuities in methodological and disciplinary orientations in a single volume. *The Routledge Handbook of French Politics and Culture* will be essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in, and actively concerned about, research on French politics, society and culture. In these studies, scholars from the United States and Indonesia identify some of the cultural roots of Indonesian political behavior. The authors, representing the fields of anthropology, history, and political science, explore the ways in which traditional institutions, beliefs, values, and ethnic origins affect notions of power and rebellion, influence political party affiliations, and create new modes of cultural expression. Using two different but contemporary approaches, the authors show what can be learned about Indonesia through use of the Western concepts of "culture" and "politics". Professors Lev, Liddle, and Sartono illustrate how much can be gained from presenting Indonesian life in Western terms, while Professors Abdullah and Anderson contrast Indonesian and Western ideas. In an Afterword, Clifford Geertz reflects on the questions raised in these essays by discussing the tense relationships between Indonesian political institutions

and the cultural framework in which they exist. CLAIRE HOLT was, until her death in 1970, Senior Research Associate of the Modern Indonesia Project, Cornell University. In Indonesia she served as assistant to the late Dr. W.F. Stutterheim, the noted archaeologist and cultural historian. She lectured extensively in Europe, the Far East, and the United States on Indonesian culture, and worked as a researcher and training specialist for the US Department of State. Brand new collection of the essential essays from one of the founders of cultural studies, Raymond Williams Raymond Williams was a pioneering scholar of cultural and society, and one of the outstanding intellectuals of the twentieth century. In this, a collection of difficult to find essays, some of which are published for the first time, Williams emerges as not only one of the great writers of materialist criticism, but also a thoroughly engaged political writer. Published to coincide with the centenary of his birth and showing the full range of his work, from his early writings on the novel and society, to later work on ecosocialism and the politics of modernism, *Politics and Culture* shows Williams at both his most accessible and his most penetrating. An essential book for all those interested in the politics of culture in the twentieth century, and the development of Williams's work. This volume addresses these key issues through an analysis of important theoretical debates on issues such as digital democracy, cultural politics and transnational communities. Featuring contributors from both sides of the Atlantic, the book contains a series of case studies on new social movements including campaigns on the environment, gender, animal rights and human rights. It combines cutting edge research with theoretical material and makes an important contribution to this highly topical and rapidly growing area. This book will be invaluable reading for students in areas including Politics, Communications and IT, Sociology and Cultural Studies. A sophisticated argument about how the internet and communication networks impact on politics, democracy, and identity. From the Revolutionary War forward, Irish immigrants have contributed significantly to the construction of the American Republic. Scholars have documented their experiences and explored their social, political, and cultural lives in countless books. Offering a fresh perspective, this volume traces the rich history of the Irish American diaspora press, uncovering the ways in which a lively print culture forged significant cultural, political, and even economic bonds between the Irish living in America and the Irish living in Ireland. As the only mass medium prior to the advent of radio, newspapers served to foster a sense of identity and a means of acculturation for those seeking to establish themselves in the land of opportunity. Irish American newspapers provided information about what was happening back home in Ireland as well as news about the events that were occurring within the local migrant community. They framed national events through Irish American eyes and explained the significance of what was happening to newly arrived immigrants who were unfamiliar with American history or culture. They also played a central role in the social life of Irish migrants and provided the comfort that came from knowing that, though they may have been far from home, they were not alone. Taking a long view through the prism of individual newspapers, editors, and journalists, the authors in this volume examine the emergence of the Irish American diaspora press and its profound contribution to the lives of Irish Americans over the course of the last two centuries. Political Culture (defined as the values, beliefs, and behavioral patterns underlying the political system) has long had an uneasy relationship with political science. Identity politics is the latest incarnation of this conflict. Everyone agrees that culture and identity are important, specifically political culture, is important in understanding other countries and global regions, but no one agrees how much or how precisely to measure it. In this important book, well known Comparativist, Howard J. Wiarda, traces the long and controversial history of culture studies, and the relations of political culture and identity politics to political science. Under attack from structuralists, institutionalists, Marxists, and dependency writers, Wiarda examines and assesses the reasons for these attacks and why political culture went into decline only to have a new and transcendent renaissance and revival in the writings of Inglehart, Fukuyama, Putnam, Huntington and many others. Today, political culture, now updated to include identity politics, stands as one of these great explanatory paradigms in political science, the others being structuralism and institutionalism. Rather than seeing them as diametrically exposed, Howard Wiarda shows how they may be made complementary and woven together in more complex, multicausal explanations. This book is brief, highly readable, provocative and certain to stimulate discussion. It will be of interest to general readers and as a text in courses in international relations, comparative politics, foreign policy, and Third World studies. The bodies and minds of children--and the very space of children--are under assault. This is the message we receive from daily news headlines about violence, sexual abuse, exploitation, and neglect of children, and from a proliferation of books in recent years representing the domain of contemporary childhood as threatened, invaded, polluted, and "stolen" by adults. Through a series of essays that explore the global dimensions of children at risk, an international group of researchers and policymakers discuss the notion of children's rights, and in particular the claim that every child has a right to a cultural identity. Explorations of children's situations in Japan, Korea, Singapore, South Africa, England, Norway, the United States, Brazil, and Germany reveal how children's everyday lives and futures are often the stakes in contemporary battles that adults wage over definitions of cultural identity and state cultural policies. Throughout this volume, the authors address the complex and often ambiguous implications of the concept of rights. For example, it may be used to defend indigenous children from radically assimilationist or even genocidal state policies; but it may also be used to legitimate racist institutions. A substantive introduction by the editor examines global political economic frameworks for the cultural debates affecting children and traces intriguing, sometimes surprising, threads throughout the papers. In addition to the editor, the contributors are Norma Field, Marilyn Ivy, Mary John, Hae-joang Cho, Saya Shiraishi, Vivienne Wee, Pamela Reynolds, Kathleen Hall, Ruth Mandel, Manuela Carneiro da Cunha, and Njabulo Ndebele. Traces the history of zine publishing from its origins by science fiction cults, its growth with the 1960s counter culture, and its attachment to punk rock "Cultural politics in Harry Potter: life, death and politics of fear is the first book-length analysis of topics such as death, fear and biopolitics in J. K. Rowling's work from controversial and interdisciplinary perspectives. This collection brings together recent theoretical and applied cultural studies and focuses on three key areas of inquiry: wizarding biopolitics and intersected discourses; anxiety, death, resilience and trauma; and politics of fear and postmodern transformations. As such this book: - provides a comprehensive overview of national and gender discourses, as well as the transiting bodies in-between, in relation to the Harry Potter books series and related multimedia franchise; - situates the transformative power of death within the fandom, transmedia and film depictions of the Potterverse and critically deconstructs the processes of subjectivation and legitimation of death and fear; - examines the strategies and mechanisms through which cultural and political processes are managed, as well as reminding us how fiction and reality intersect at junctions such as terrorism, homonationalism, materialism, capitalism, posthumanism and technology. Exploring precisely what is cultural about wizarding politics, and what is political about culture, *Cultural Politics in Harry Potter* is key reading for students of contemporary literature, media and culture, as well as anyone with an interest in the fictional universe and *Wizarding World of Harry Potter*-- How do we define culture? To what uses should our concept of culture be put? What costs and benefits do these uses entail? Adam Muller brings together a diverse group of emerging and established scholars to probe the nature of the concept of culture while shedding light on its many different applications and contexts of use. In particular, they examine the assumed unity of culture and with arguments being made for and against over discussions of popular culture, film, globalization, sport, aesthetics, and human values. This volume brings together a variety of perspectives to add much-needed substance to our understanding of the history and politics of culture. Rigorous and interdisciplinary, *Concepts of Culture* secures a place for analytic philosophy, humanism, and liberal political theory in the ongoing discussion of exactly what culture is and how culture works. This book argues the relationship between culture and politics can be productively explored by delving into the nature of the cultural politics enacted by Latin American social movements and by examining the potential of this cultural politics for fostering social change. An exploration of the relationship between culture and politics in the modern world through essays on such varied topics as the Ayatollah Khomeini, Czech dissidents, and Malinowski. Using an innovative syncretic 'cultural politics' approach drawing on political theory,

film studies and sociology, this book unpacks how political myths about states, citizens, community, intimate life and social criticism operate in Hollywood narratives. With "race" being discredited as a rallying cry for populist movements because of the atrocities committed in its name during World War II, "culture" has been adopted by right-wing groups instead, but used in the same exclusionary manner as racism was. This volume examines the essentialism, which is implicit in racial theories and re-emerges in the ideological use of cultural identity in new rightist movements, and presents case studies from different parts of the world where researchers were confronted with racism and worked out ways of coping with it. Once the major success story of a troubled continent, by the early 1990s Kenya came to be regarded as its fallen star. This book challenges such images of reversal and the analytical polarities which sustain them. The analysis ranges from telescopic to microscopic fields, and combining many disciplines and perspectives to give a rich and varied picture of the culture of politics in twentieth-century Kenya. '...a highly perceptive and interesting analysis, deconstruction is not too strong a term, of Kenya's politics....[A] well researched, documented and enlightening book' African Affairs This book analyses a key episode in the cultural Cold War - the formation of the Congress for Cultural Freedom. Whilst the Congress was established to defend cultural values and freedom of expression in the Cold War Struggle, its close association with the CIA later undermined its claims to intellectual independence or non-political autonomy. By examining the formation of the Congress and its early years of existence in relation to broader issues of US-European relations, Giles Scott-Smith reveals a more complex interpretation of the story. The Politics of Apolitical Culture provides an in-depth picture of the various links between the political, economic and cultural realms which led to the Congress. Experiencing Disco, HipHop, House, Techno, Drum 'n' Bass and Garage Discographies traces the history of ideas about music and dance in Western culture. E. Ann Kaplan explores the relationship between the impact of trauma on individuals and on entire cultures and nations. Arguing that humans possess a need to draw meaning from personal experience and to communicate what happens to others, she examines the forms that are used to bridge the experience. In pre-publication, book had the subtitle Diversity and its discontents. "Innovative study of the cultural legacy of the Mexican Revolution, using the story of rural schools. Focuses on Puebla and Sonora and the attempt by the central government to implement socialist education and to advance its nationalist agenda. Stresses the importance of negotiation among national and local leaders, teachers and peasants"--Handbook of Latin American Studies, v. 58. Making Sense of History is a historian's exploration of the past and present. Some articles, essays and interviews supplement his scholarly publications, but most reflect Professor Hasan's present-day concerns. Thus, he writes on 11 September, on Palestine and on pogrom in Gujarat. He dwells on the rise of Hindu nationalism and Islamic fundamentalism and critically evaluates their cultural and ideological resources. His is a story that resonates with ideas on the contemporary Indian scene. This book also devotes a section to some of the leading Western and South Asian interpreters of Islam. Without being apologetic about Islamic teachings. Professor Hasan engages with a wide range of topics of concern to contemporary Muslims in India and overseas. Covering a variety of themes including jihad, education, literature and political thought, he clears up some distortions and misrepresentation's about Islam and the Muslim communities. Professor Hasan airs his views with unusual candour. He is clear in his thinking, lucid in his exposition, and uninhibited in communicating with his newspaper readers. The book affords many valuable insights and interesting analyses. Readers seeking an understanding of aspects of Indian history and contemporary affairs will find a sensitive handling of the various social, cultural and political issues. Latino/a Thought brings together the most important writings that shape Latino consciousness, culture, and activism today. This historical anthology is unique in its presentation of cross cultural writings especially from Mexican, Puerto Rican, and Cuban writers and political documents that shape the ideology and experience of U.S. Latinos. Students can read, first hand, the works or authors who most shaped their cultural heritage. They are guided by vivid introductions that set each article or document in its historical context and describe its relevance today. The writings touch on many themes, but are guided by this book's concern for a quest for public citizenship among all Latino populations and a better understanding of racialized populations in the U.S. today. No other book offers readers such a rich history of the Latino heritage experienced in this book in the voices and political actions whose influence reached across generations." Considers the issues of racism, violence, health, children, education, and peace as they affect the lives of women on a global scale. This book of tightly woven dialogues engages prominent thinkers in a discussion about the role of culture-broadly construed-in contemporary society and politics. Faced with the conceptual inflation of the notion of 'culture,' which now imposes itself as an indispensable issue in contemporary moral and political debates, these dynamic exchanges seek to rethink culture and critique beyond the schematic models that have often predominated, such as the opposition between "mainstream multiculturalism" and the "clash of civilizations." Prefaced by an introduction relating current cultural debates to the critical theory tradition, this book examines the politics of culture and the spirit of critique from three different vantage points. To begin, Gabriel Rockhill and Alfredo Gomez-Muller provide a stage-setting dialogue, followed by discussions with two major representatives of contemporary critical theory: Seyla Benhabib and Nancy Fraser. Working at the horizons of this tradition, Judith Butler, Immanuel Wallerstein, and Cornel West then provide important critical perspectives on cultural politics. The book's concluding section engages with Michael Sandel and Will Kymlicka, who work out of the Rawlsian tradition yet are uniquely concerned with the issue of culture, broadly understood. The epilogue, an interview with Axel Honneth, returns to the core issue of critical theory in cultural politics. Ranging from recent developments and progressive interventions in critical theory to dialogues that incorporate its insights into larger discussions of social and political philosophy, this book sharpens old critical tools while developing new strategies for rethinking the role of 'culture' in contemporary society. Until recently, mainstream American environmentalism has been a predominantly white, middle-class movement, essentially ignoring the class, race, and gender dimensions of environmental politics. In this provocative collection of original essays, the environmental dimensions of the Chicana/o experience are explicitly expressed and debated. Employing a variety of genres ranging from poetry to autobiography to theoretical and empirical essays, the voices in this collection speak to the most significant issues of environmentalism and social justice, recognizing throughout the need for a pluralism of Chicana/o philosophies. The contributors provide an excellent basis for understanding how multiple Chicana/o views on the environment play out in the context of dominant social, political and economic views. Chicano Culture, Ecology, Politics examines a number of Chicana/o ecological perspectives. How can the ethics of reciprocity present in Chicana/o agropastoral life be protected and applied on a broader scale? How can the dominant society, whose economic structure is invested in "placeless mobility," take note of the harm caused to land-based cultures, take responsibility for it, and take heed before it is too late? Will the larger society be "ecologically housebroken" before it destroys its home? Grounded in actual political struggles waged by Chicana/o communities over issues of environmental destruction, cultural genocide, and socioeconomic domination, this volume provides an important series of snapshots of Chicana/o history. Chicano Culture, Ecology, Politics illuminates the bridges that exist—and must be understood—between race, ethnicity, class, gender, politics, and ecology. It addresses what, in both conceptual and

political terms, is arguably the most important source of tension and confusion in current arguments about the environment, namely the concept of nature; and it does so in a way that is both sensitive to, and critical of, the two antithetical ways of understanding this that dominate existing discussions.' Russell Keat, University of Edinburgh This book uses surveys, statistics, and case studies to explain why and how cultural norms affect political attitudes and behavior. Focusing on cultural values and norms as they are translated into politics and policy outcomes, this book presents a unique contribution in combining research from varied disciplines and from both the developed and developing world. This collection draws from multiple perspectives to present an overview of the knowledge related to our current understanding of climate change politics and culture. It is divided into four sections – Culture and Values, Communication and Media, Politics and Policy, and Future Directions in Climate Politics Scholarship – each followed by a commentary from a key expert in the field. The book includes analysis of the challenges and opportunities for establishing successful communication on climate change among scientists, the media, policy-makers, and activists. With an emphasis on the interrelation between social, cultural, and political aspects of climate change communication, this volume should be of interest to students and scholars of climate change, environment studies, environmental policy, communication, cultural studies, media studies, politics, sociology.
