A different way of discovering and developing the best business ideas Jack Welch once said, "Someone, somewhere has a better idea." In this myth-busting book, the authors reveal that great business ideas do not spring from innate creativity, or necessarily from the brilliant minds of people. Rather, great ideas come to those who are in the habit of looking for great ideas all around them, all the time. Too often, people fall into the trap of thinking that the only worthwhile idea is a thoroughly original one. Idea Hunters know better. They understand that valuable ideas are already out there, waiting to be found - and not just in the usual places. Shows how to expand your capacity to find and develop winning business ideas Explains why ideas are a critical asset for every manager and professional, not just for those who do "creative" Reveals how to seek out and select the ideas that best serve your purposes and goals and define who you are, as a professional Offers practical tips on how to master the everyday habits of an Idea Hunter, which include cultivating great conversations The book is filled with illustrative accounts of successful Idea Hunters and stories from thriving "idea" companies. Warren Buffet, Walt Disney, Thomas Edison, Mary Kay Ash, Twitter, and Pixar Animation Studios are among the many profiled. In The Problem of the Idea of Culture in John Paul II: Exposing the Disruptive Agency of the Philosophy of Karol Wojtyła, John Corrigan provides a new lens with which to view and understand the philosophy of Karol Wojtyła/John Paul II. He exposes Wojtyła as a major player in contemporary philosophical debates. The work reformulates the "problem of experience" in light of the questions surrounding our idea of culture. Corrigan argues that for

Wojtyła's drama of the "problem of experience" manifests in the apparently divergent accounts of the meaning of human experience as presented by the philosophies of being and of consciousness. Solving this conundrum results in an idea of the person capable of explaining human experience in relation to human culture, unfolding the experiences of self-knowledge, conscience, and the ontic-causal relationship of the person to human culture. The first part of the book concerns formal considerations regarding the constitutive aspects of Wojtyła's approach, while the second part deals with pragmatic considerations drawn from his comments on culture. Samuel Coleridge (1772-1834) was probably the first person to read William Wordsworth (1770-1850) philosophically, says Joplin (English, Utah Valley State College). And so it is with the connection between former's thought and latter's poetry that he begins his endeavor to carry the philosophical study of Wordsworth in a new direction. He focuses on Coleridge's dynamic philosophy as a context within which to shed more light on certain aspects of Wordsworth's poetry that he feels remain to be explained, specifically the intimate reciprocity between mind and nature that marks his work between 1798 and 1805. The text is double spaced.

Annotation copyrighted by Book News, Inc., Portland, OR. New York Times bestseller! If your funny older sister were the former deputy chief of staff to President Barack Obama, her behind-the-scenes political memoir would look something like this... Alyssa Mastromonaco worked for Barack Obama for almost a decade, and long before his run for president. From the then-senator's early days in Congress to his years in the Oval Office, she made Hope and Change happen through blood, sweat, tears, and lots of briefing binders. But for every historic occasion-meeting the queen at Buckingham Palace, bursting in on secret climate talks, or nailing a campaign speech in a hailstorm-there were dozens of less-than-perfect moments when it was up to Alyssa to save the day. Like the time she learned the hard way that there aren't nearly enough bathrooms at the Vatican. Full of hilarious, never-before-told stories, WHO THOUGHT THIS WAS A GOOD IDEA? is an intimate portrait of a president, a book about how to get stuff done, and

the story of how one woman challenged, again and again, what a "White House official" is supposed to look like. Here Alyssa shares the strategies that made her successful in politics and beyond, including the importance of confidence, the value of not being a jerk, and why ultimately everything comes down to hard work (and always carrying a spare tampon). Told in a smart, original voice and topped off with a couple of really good cat stories, **WHO THOUGHT THIS WAS A GOOD IDEA?** is a promising debut from a savvy political star. Welcome to a machine-quilting book like no other. It's a helpful guide to machine-quilting designs for a dozen classic quilt blocks! No guessing, no stressing--these 61 designs show you exactly how to quilt specific blocks, and you choose the challenge. With four to six ways to quilt each block, you'll find machine-quilting designs for beginners, advanced quilters, and everyone in between. Designs are rated with one, two, or three spools: One spool: Light quilting, no marking, easy to stitch--perfect for finishing quilts quickly. Two spools: A little more adventurous--try swirls, pebbles, feathers, and more. Three spools: Dense quilting, grid work, and ruler work--plus more feathers! Start with an introduction to basic tools, supplies, and best practices. Then jump right in with color-coded illustrations that tell you which path to follow and when. Yes, you can quilt it--begin with any of the blocks below and Vicki Ruebel will show you how! This book assesses the relationship of literature to various other cultural forms in the Middle Ages. Jesse M. Gellrich uses the insights of such thinkers as Levi-Strauss, Foucault, Barthes, and Derrida to explore the continuity of medieval ideas about speaking, writing, and texts. How a simple creative act spreads a message of love and acceptance around the world Emily ' s idea started small. Many beautiful ideas do. She folded, doodled, and snipped. But also, like many ideas, Emily ' s small idea grew. When a little girl decides to create a paper chain of dolls, her idea catches on. Then it spreads far and wide as children around the world begin to create and share their own. This is the story of how that girl's simple creative act

spreads the message of love and acceptance around the world. For readers ages 4 – 8. Includes a make-your-own page to help you get started on your own paper doll chains. From the mid-nineteenth century until the 1930s, many Latin American leaders faced a difficult dilemma regarding the idea of race. On the one hand, they aspired to an ever-closer connection to Europe and North America, where, during much of this period, "scientific" thought condemned nonwhite races to an inferior category. Yet, with the heterogeneous racial makeup of their societies clearly before them and a growing sense of national identity impelling consideration of national futures, Latin American leaders hesitated. What to do? Whom to believe? Latin American political and intellectual leaders' sometimes anguished responses to these dilemmas form the subject of *The Idea of Race in Latin America*. Thomas Skidmore, Aline Helg, and Alan Knight have each contributed chapters that succinctly explore various aspects of the story in Brazil, Argentina, Cuba, and Mexico. While keenly alert to the social and economic differences that distinguish one Latin American society from another, each author has also addressed common issues that Richard Graham ably draws together in a brief introduction. Written in a style that will make it accessible to the undergraduate, this book will appeal as well to the sophisticated scholar.

Let *The Writer ' s Idea Book* give you the insight and self-awareness to create and refine ideas that demand to be transformed into greater works, the kind

of compelling, absorbing writing that will have other writers asking "where do you get your ideas?" The antidote to low morale and high turnover starts with mindfulness and self-care, and this resource presents myriad proactive and positive ideas for making libraries a fulfilling workplace. Reaching into our own time, *Crisis and the Apocalypse of Man* confronts the disintegration of traditional sources of meaning and the correlative attempt to generate new sources of order from within the self. Voegelin allows us to contemplate the crisis in its starkest terms as the apocalypse of man that now seeks to replace the apocalypse of God. The totalitarian upheaval that convulsed Voegelin's world, and whose aftermath still defines ours, is only the external manifestation of an inner spiritual turmoil. Its roots have been probed throughout the eight volumes of *History of Political Ideas*, but its emergence is marked by the age of Enlightenment. In our postmodern era, discussions of the collapse of the "enlightenment project" have become commonplace. Voegelin compels us to follow the great-souled individuals who sought to go from disintegration of the present toward evocations of order for the future. Such thinkers as Comte, Bakunin, and Marx suffered through the crisis and fully understood the need for a new outpouring of the spirit. They resolved to supply the deficiency themselves. As a consequence they launched us irrevocably on the path of the apocalypse of man. One of the great merits of Voegelin's analysis is his exposition of the pervasive character of this crisis. It is not confined to the megalomaniacal dreamers of a revolutionary apocalypse; rather, echoes of it are found in the more moderate Enlightenment preoccupation with progress to be attained through application of the scientific method. Faith in the capacity of instrumental reason to answer the ultimate questions of human existence defined men such as Voltaire, Helvétius, Diderot, D'Alembert, and Condorcet. It remains the authoritative faith of our world today, Voegelin argues, demonstrated by our continuing inability to step outside the parameters of the Enlightenment. Are we condemned, then, to oscillate between the rational incoherence of a science that never delivers on its promises and a now discredited revolutionary idealism that wreaks havoc in practice? This is

the question toward which Voegelin's final volume points. While not direct, his response is evident everywhere. *Crisis and the Apocalypse of Man* could have been written only by a man who had reached his own resolution of the crisis. "Dan Frost shows how, inspired by the idea of progress, these men set about transforming Southern higher education. Recognizing the north's superiority in industry and technology, they turned their own schools from a classical orientation to a new emphasis on science and engineering. These educators came to define the Southern idea of progress and passed it on to their students, thus helping to create and perpetuate an expectation for the arrival of the New South."--BOOK JACKET. labyrinths embody paradox, according to Penelope Reed Doob. Their structure allows a double perspective—the baffling, fragmented prospect confronting the maze-treader within, and the comprehensive vision available to those without. Mazes simultaneously assert order and chaos, artistry and confusion, articulated clarity and bewildering complexity, perfected pattern and hesitant process. In this handsomely illustrated book, Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the Middle Ages. Doob first examines several complementary traditions of the maze topos, showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity, while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity. She then describes two common models of the labyrinth and explores their formal implications: the unicursal model, with no false turnings, found almost universally in the visual arts; and the multicursal model, with blind alleys and dead ends, characteristic of literary texts. This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze, as Doob's examination of a vast array of materials from the classical period through the Middle Ages suggests. She concludes with linked readings of four "labyrinths of words": Virgil's *Aeneid*, Boethius' *Consolation of Philosophy*, Dante's *Divine Comedy*, and Chaucer's *House of Fame*, each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it. Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition, but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works. Readers in such fields as Classical literature, Medieval Studies, Renaissance Studies, comparative literature, literary theory, art history, and intellectual history will welcome this wide-ranging and illuminating book. The creators of the hugely popular blog *A Beautiful Mess*, sharing their love of photo-taking, show readers how to document their real lives with beautiful images by providing a wealth of inspiration and tips on finding great light, capturing emotion, recreating old

photos and more. Original. The quasi-federal European Union stands out as the major exception in the thinly institutionalized world of international politics. Something has led Europeans—and only Europeans—beyond the nation-state to a fundamentally new political architecture. Craig Parsons argues in *A Certain Idea of Europe* that this "something" was a particular set of ideas generated in Western Europe after the Second World War. In Parsons's view, today's European Union reflects the ideological (and perhaps visionary) project of an elite minority. His book traces the progressive victory of this project in France, where the battle over European institutions erupted most divisively. Drawing on archival research and extensive interviews with French policymakers, the author carefully traces a fifty-year conflict between radically different European plans. Only through aggressive leadership did the advocates of a supranational "community" Europe succeed at building the EU and binding their opponents within it. Parsons puts the causal impact of ideas, and their binding effects through institutions, at the center of his book. In so doing he presents a strong logic of "social construction"—a sharp departure from other accounts of EU history that downplay the role of ideas and ideology. Describes the invention of the algorithm, first theorized by Leibniz, and the dramatic implications of this mathematical discovery on the development of computer technology and the working of DNA. This book serves as an introduction to the key elements of good design. Broken into sections covering the fundamental elements of design, key works by acclaimed designers serve to illustrate technical points and encourage readers to try out new ideas. Themes covered include narrative, colour, illusion, ornament, simplicity, and wit and humour. The result is an instantly accessible and easy to understand guide to graphic design using professional techniques. An extensive scholarly literature, written in the past century holds that in ancient Greek and Roman thought history is understood as circular and repetitive - a consequence of their anti-temporal metaphysics - in contrast with Judaeo-Christian thought, which sees history as linear and unique - a consequence of their messianic and hence radically temporal theology. Gerald Press presents a more general

view - that the Graeco-Roman and Judaeo-Christian cultures were fundamentally alien and opposed cultural forces and that, therefore, Christianity's victory over paganism included the replacement or supersession of one intellectual world by another - and then shows that, contrary to this view, there was substantial continuity between "pagan" and Christian ideas of history in antiquity, rather than a striking opposition between cyclic and linear patterns. He finds that the foundation of the Christian view of history as goal-directed lies in the rhetorical rather than the theological motives of early Christian writers. The completely revised "All New Built-Ins Idea Book" showcases a wide range of built-in and storage possibilities. A handy visual clip file, it's full of fresh ideas for creating rooms that are both functional and stylish. As the countries of East-Central Europe struggle to create liberal democracy and the United States and other Western nations attempt to rediscover their own tarnished civil institutions, Adam Seligman identifies the neglect of the idea of "civil society" as a central concern common to both cultures today. Two centuries after its origins in the Enlightenment, the idea of civil society is being revived to provide an answer to the question of how individuals can pursue their own interests while preserving the greater good of society and, similarly, how society can advance the interests of the individuals who comprise it. However, as Seligman shows, the erosion of the very moral beliefs and philosophical assumptions upon which the idea of civil society was founded makes its revival much more difficult than is generally recognized. Community Christian Church embraced the Big Idea and everything changed. They decided to avoid the common mistake of bombarding people with so many 'little ideas' that they suffered overload. They also recognized that leaders often don't insist that the truth be lived out to accomplish Jesus' mission. Why? Because people's heads are swimming with too many little ideas, far more than they can ever apply. The Big Idea can help you creatively present one laser-focused theme each week to be discussed in families and small groups. The Big Idea shows how to engage in a process of creative collaboration that brings people together and maximizes missional impact. The Big Idea can energize a church staff and bring alignment and focus to many diverse church ministries. This book shows how the Big Idea has helped Community Christian Church better accomplish the Jesus mission and reach thousands of people in nine locations and launch a church planting network with partner churches across

the country. This book is part of the Leadership Network Innovation Series.
